Equitrac Express[®] for Kyocera MFPs

HELPING EDUCATIONAL INSTITUTIONS REDUCE PRINT COSTS

Today's educational institutions are continually challenged to balance increased printing and copying requirements with initiatives in cost reduction, security and environmental sensitivity. Kyocera offers a simple and convenient way to meet this challenge with the **Equitrac Express[®]** solution, available on select Kyocera multifunctional products (MFPs). Whether you are a single school, district-wide network or multi-campus site, the Kyocera Equitrac solution will provide enhanced control of your documents and devices, enabling you to free up dollars that can better be utilized for important academic programs.

- **Track and manage usage and costs** by user type, device, department, or location
- **Control costs** by setting and enforcing print quotas
- **Enhance security** of printed exams or students' personal information through password-protected output
- **Multiple payment options** including campus card, credit card, cash or account code
- **Reduce environmental waste** by curbing unnecessary printing

Easy to Use and Highly Secure

Equitrac's versatile solution enables administrators to set multiple output policies for faculty, students and staff and track individual and group print and copy output costs. Equitrac also simplifies output through its innovative Follow-You Printing[®] feature that allows users to output and retrieve their documents in a secure manner from any Equitrac enabled device.

Cost Accountability Means Smart Printing Decisions

Easy access to 'free' printing and copying results in overuse of your hardware investments and wasteful output. Equitrac allows administrators to define different price schedules for staff, faculty and students, as well as set multiple payment options so users and groups employ the most flexible and convenient method of payment.

By making users accountable for the cost of their printed documents, educational institutions can substantially reduce unnecessary output and its financial impact, while also eliminating waste and fostering environmentally friendly practices.
